

**19<sup>th</sup> CUBAN CONGRESS ON UROLOGY**  
**12<sup>th</sup> CENTRAL-AMERICAN AND CARIBBEAN CONGRESS ON UROLOGY**  
**PRE-CONGRESS COURSE**

**TITLE: NEW APPROACHES IN URINARY TRACT INFECTIONS**

**BASIS:** The Urinary Tract Infection (UTI) is considered by some authors as the most common bacterial infectious disease in children of non-epidemic nature. In adults, it is the second significant group following the one of respiratory diseases in infections outside of hospitals. The proper therapeutic and diagnostic management of this disease made by urologists, nephrologists, pediatricians, clinical staff and general practitioners, is essential to guarantee the appropriate progress in these cases, as well as to establish a prognosis and avoid further complications. This course is intended to bring this topic up to date and to look deeper into the most important aspects related to UTI treatment in all levels of our National Health System.

**OBJECTIVE:** To update and to look deeper into the aspects related to the therapeutic and diagnostic management of pediatric patients suffering from an Urinary Tract Infection, according to the new tendencies achieved in the image diagnosis of the disease and the breakthroughs in the treatments, hoping to achieve excellence in the health services provided for the population.

## **PROFESSORS:**

- ❖ Dr. María E. de la Moneda Güillerme (Organizer)  
First and Second Grade Urology Specialist  
Master Degree on Sciences of Higher Education  
Assistant Professor of Urology  
Applicant for the title of Doctor of Pedagogical Sciences  
“Ángel Arturo Aballí” University Pediatric Hospital
  
- ❖ Mrs. Lourdes María Pérez Clemente  
First Grade Pediatrics Specialist  
Second Grade Nephrology Specialist  
Master of Infectious Diseases  
Pediatrics Instructor Professor  
University Pediatric Hospital of Centro Habana
  
- ❖ Mr. Yobanys Rodríguez Téllez  
First Grade Specialist in General Medicine  
First Grade Specialist in Pediatric Intensive Care Therapy and Emergency  
Medicine  
Master of Comprehensive Child and Youth Care  
Pediatrics Instructor Professor  
University Pediatric Hospital of Centro Habana
  
- ❖ Dr. Yadelis H. Pérez del Campo  
First and Second Grade Nephrology Specialist  
Qualified in Pediatric Nephrology  
Master of Comprehensive Child and Youth Care  
University Pediatric Hospital of Centro Habana
  
- ❖ Dr. Saharaí Morales Ortíz  
First Grade Specialist in General Medicine  
First Grade Nephrology Specialist  
Master of Comprehensive Child and Youth Care  
Qualified in Pediatric Intensive Care Therapy  
University Pediatric Hospital of Centro Habana
